

Process Chart

Step 1- Download the Web log data set from Web Site.

Data Overview Kernels (19) Discussion (9) Activity Download (5 MB)

Data (5 MB)

Data Sources	About this file	Columns
<ul style="list-style-type: none"> complete.csv 18.0k x 185 complete.feather 	<p>The complete dataset of players in FIFA 18, in .csv format. Some of the columns contain special characters so you'll have to use UTF-8 encoding to read the .csv in properly. In pandas you do this using <code>pd.read_csv(filepath, encoding='utf_8')</code>.</p> <p>Also, if you're using Python, R or Julia, have a look at <code>complete.feather</code> - it should be more convenient once you have the dependencies installed.</p>	<ul style="list-style-type: none"> # ID Player ID A name Player Name A full_name A club A club_logo # special # age A league # birth_date

Step-2 Analyze both data .
